What is a Silver Strike?

Silver Strikes are limited edition silver tokens in plastic cases won from slot machines. They were introduced by casinos in the Reno/Tahoe area of Nevada in 1992.

Silver Strikes have been issued in denominations of $2, $3, $7, $10, $20, $28, $40, $200, and $300.

The Silver Strikes in slot machines today are all $10 denominations. The $300 Silver Strikes, when available, are obtained by redeeming 30 ten dollar strikes at the casino cage.

Red and blue color capsules with $10 Silver Strikes are "chase" strikes. Minted in limited quantities, those strikes are placed randomly among the strikes in clear capsules.

The Nevada Gaming Control Board approves the casino design and minting specifications for Silver Strikes.

Visit the Silver Strikers Club website, www.silverstrikers.com for locations of Nevada casinos with Silver Strike machines.

How many different Nevada Silver Strikes have been issued? Is there a list?

Since 1992 thousands of different Nevada Silver Strikes have been issued in various denominations by many Nevada casinos. They are all listed in the "Comprehensive Silver Strike Reference Catalog", with year of issue, silver weight and auction prices. Visit wcohenour@earthlink.net for information.

What is the silver content of Silver Strikes?

The silver content of $10 Silver Strikes is approximately .50 to .60 ounces. Beginning in late 2008 the centers of $10 Silver Strikes in clear capsules were changed to clad (brass insert silver plate) and have no .999 silver markings. Red capsule strikes still have a .999 silver content.

The silver content of a $200 Silver Strikes is 12 ounces (1 Troy pound).

Beginning in 2011 the silver content of $300 Silver Strikes was changed to 6 ounces with a silver plated copper ring.
