

*Collector Series  
Silver Coins*

**E**ach coin is sculpted in amazing detail by acclaimed artists. A series of five models and molds are made for each coin. The molds require refinement and precision sculpting so that the finished die will capture all the detail and emotion of the original. Each coin is struck from .999 fine silver. The silver is subjected to temperatures in excess of 2,300°F, to assure purity. The silver is formed into 200, strips and precision blanks are punched out, to assure accurate weight and size. Finally, the blanks are struck by a special press with 100 tons of pressure and then polished to a brilliant sheen. Your coin has been minted using the same process that the United States Mint uses to make our country's currency and medallions.

*Collector Series  
Silver Coins*

**E**ach coin is sculpted in amazing detail by acclaimed artists. A series of four models and molds are made for each coin. The molds require refinement and precision sculpting so that the finished die will capture all the detail and emotion of the original. Each coin is struck from .999 fine silver. The silver is subjected to temperatures in excess of 2,300°F, to assure purity. The silver is formed into 200. strips and precision blanks are punched out, to assure accurate weight and size. Finally, the blanks are struck by a special press with 180 tons of pressure and then polished to a brilliant shine. Your coin has been minted using the same process that the United States Mint uses to make our country's currency and medallions.
